

The scatter plot displays data points for two stations, 1089 (blue) and 1253 (orange), across a time series. The x-axis is labeled 'Date & Time' and shows multiple '00:00' markers. The y-axis represents a numerical value. A legend titled 'Stations' is located in the upper left, listing the station IDs with corresponding colored circles. The data points are clustered, showing distinct patterns of activity for each station over time.
