

A scatter plot showing data points for two stations, 1089 (blue) and 1253 (orange), over time. The x-axis is labeled 'Date & Time' and has five '00:00' markers. The y-axis has four unlabeled horizontal grid lines. Station 1089 data points are clustered in the lower-left, middle-left, middle-right, and upper-right areas. Station 1253 data points are clustered in the upper-left, middle-left, middle-right, and lower-right areas. A legend box in the lower-left corner identifies the colors for stations 1089 and 1253.
